FOR IMMEDIATE PUBLICATION

## **Canvys Announces Expanded Product Portfolio with NEC MultiSync 20 - 30 inch LCD Displays**

Canvys – Consultation, design, development and implementation of comprehensive visual technology solutions for health care, Original Equipment Manufacturers (OEMs) and digital signage applications

**Donaueschingen - 04.07.2010.** Canvys, a global value-added touch screen and protective shield integrator of branded and non-branded LCD displays has expanded its LCD product line up to include NEC MultiSync® LCD displays in 20 - 30 inch screen sizes (including wide format 16:10).

Canvys offers the latest in touch technologies and determines the right solution for the customer application based on a number of factors – from the surrounding environments to end-user preferences. Interactive displays often stimulate attention and facilitate the participation of the end-user often enhancing and improving the overall customer experience. With Canvys, customers can deploy a broad range of interactive display solutions designed for digital signage and public venues.

### **Applications/Venues for interactive display solutions:**

- Information and Wayfinding
- Digital signage applications
- Entertainment Venues
- Product selection and narrowing
- Training/Education
- Healthcare Facilities

Canvys also offers touch screen and safety glass integration for 32- 52 inch large format displays and the following desktop displays:

	Screen Size	Model description	Resolution
•	30 inch	LC-LCD3090WQXI	2560 x 1600
•	26 inch	LC-LCD2690WUXI	1920 x 1200
•	24 inch	LC-LCD2490WUXI	1920 x 1200
•	21 inch	LC-LCD2190UXP	1600 x 1200
•	20 inch	LC-LCD2090UXi	1600 x 1200

The 16:10 wide format NEC MultiSync® series displays offer a high resolution and more active screen surface in comparison to the 4:3 format displays and ensures an ideal overview for standard and special applications. The image quality of the MultiSync® series, particularly the wide viewing angle and high contrast values, is exceptional thanks to the IPS or PVA panels. Due to the HDCP support and the DVI interface, full HD content (high definition 1080p) is reproduced beautifully. The NEC displays also ensure quick response times for preview displays and video clips. The ergonomic design, height adjustment and 90° rotation, allows for use in the portrait format. The displays have a diverse range of inputs for entertainment purposes as well as innovative functions such as TileMatrix & TileComp along with AmbiBright – an integrated light sensor for ergonomic and energy-saving settings according to the surrounding light conditions.

Samples are available immediately.

Technical details and prices can be obtained upon request.

Please contact us for details on the possible options.
